SEATS

There are two types of materials that are used to construct toilet seats being UF, which stands for Urea-Formaldehyde, and PP, which stands for Polypropylene.

Urea-Formaldehyde

- The UF material does not scratch
- It is easy to clean and smooth to touch
- UF looks more like ceramic and less like plastic than the PP material
- When you tap on it you will notice it has a 'deeper' sound and doesn't sound 'plastic'

Polypropylene

- Shiny look
- Very Durable
- Generally inexpensive
- Lightweight
- "Plastic" look
- Not scratch resistant
